

SEPTEMBER 6 & 7, 2011
ITC MAURYA, NEW DELHI, INDIA

WORLD
ENERGY
POLICY
SUMMIT

The
World Energy Policy Summit,
WEPS, is a new annual conference to
encourage discussion, debate, and direction. It
seeks to bring together diverse views on various issues
and developments that influence shaping energy policy by
governments, companies, societies and other entities and bodies.

WEPS emphasizes that we live in an inter-dependent world that demands
better complementarity and compatibility between policies of various
governments, organizations and societies around the world. We, the Summit,
plan to play a key and dynamic role in that development.

Accordingly, the World Energy Policy Summit is exhaustive, all- encompassing,
and interaction oriented. Top policy pundits, companies, industry leaders and
executives, bankers, diplomats, academics, thinkers and opinion leaders have
been invited to probably the first independent meet of its kind in the world.

WEPS is designed to be one of the foremost conferencing and international
energy policy-shaping platforms in the world.

Narendra Taneja
President
World Energy Policy Summit
